

# EBRO PRODUCT RANGE OVERVIEW

## Resilient seated butterfly valves

Z 011-A

A universally applicable wafer type valve manufactured acc. to EN 593.

Z 014-A

A lug type butterfly valve for end of line applications.

Z 011-AS

A light weighted wafer type valve to be used in public swimming pools.

F 012-A

A double flanged valve suited for heavy duty services such as shipbuilding and wastewater plants.

F 012-K1

A double flanged valve in short construction designed for heavy duty services.

Z 411-A

The reduced inner diameter of this wafer type valve is suited to be installed in PE/PP piping systems.

Z 414-A

The reduced inner diameter of this lug type valve is suited to be installed in PE/PP piping systems.

Z 011-GMX

The special liner of this wafer type valve is suitable for applications with abrasive media.

Z 611-A

Wafer type valve with splitted body and disc and shaft in one piece.

Z 614-A

Lug type valve with splitted body and disc and shaft in one piece.

## Actuator technology

EB

DA & SR pneumatic actuator constructed to the "Scotch yoke" principle

E 65-E 210

A compact series of actuators for open/close and control functions.
